System Developer, Full stack

At Bliksund, we pride ourselves on fostering a non-hierarchical, flat structured work environment, where all team members are encouraged to share their ideas, collaborate, and contribute to our shared goals.

If you are passionate about modern software development, we'd love to hear from you!

As a Systems Developer at Bliksund, your passion lies in crafting top-notch code using industry-leading tools and methodologies to create industry-leading SaaS software. You have a genuine love for coding and a relentless curiosity for emerging technologies. Bliksund is a globally diverse company, and proficiency in Nordic languages and English is indispensable as it serves as our primary language of communication.

In terms of professional qualifications, we believe that you have:

- Solid knowledge of development principles and best practices.
- Proficiency in software development in C# and .net.
- Experience with SaaS software systems.
- Great interpersonal and communication skills.
- Bachelor's or Master's degree in Computer Science, Information and Communication Technology or related field. We value both formal education and relevant experience, and we recognize that exceptional experience may compensate for a lack of formal education.
- Ability to obtain security clearance.

Nice to have:

- Good understanding of Blazor and MAUI.
- Good understanding of software system architectures.
- Familiarity with HL7 FHIR or other communication protocols.
- Familiarity with Docker, Kubernetes, Azure DevOps and GIT.
- Familiarity with medical systems or devices.
- Knowledge of machine learning, or deep learning.

We offer:

- An opportunity to join us in building an industry-leading provider of software solutions for emergency services.
- An opportunity to build products with purpose.
- Extremely skilled and passionate colleagues that will work shoulder-to-shoulder with you to overcome challenges we face.
- Modern offices with all R&D infrastructure required.
- Competitive compensation.
- Incentives for ownership in the company.

BLIKSUND

System Developer, Full stack

Atle Havsø, email: atle.havso@bliksund.com, mob: +47 986 03 927.

Deadline for application: October 1st 2023.

Candidates will be called for interviews on an ongoing basis.

About Us

Bliksund is a fast-growing company that develops digital tools for emergency situations. Through professional collaboration and inclusive dialogue, we prioritize the users of our systems. Bliksund is a technology partner that understands the urgency of the situation. That is our strength. Bliksund consists of subject matter experts who understand the daily lives of those who need the systems. Some of us are still out there working in the emergency services. For us, it is essential that our systems live up to their promises, making the job easier and safer for those who use them. That's why we've built an organization of developers and subject matter experts based on trust and dialogue. This way, we can meet the professional communities that need our systems and establish systems for them based on a common foundation.

Innovating together is one of our key values and we provide three innovative and intuitive software solutions. Bliksund EWA is an electronic patient record system for ambulance and air ambulance services. Bliksund GRID is an operational management system for emergency & healthcare professionals, providing a holistic overview of resources, equipment and processes. Bliksund IncidentShare is a secure and intuitive live streaming solution to stream video from the scene of the incident to ensure that everyone quickly obtains the same situational awareness. It has been developed in close collaboration with users in fire and rescue, police, healthcare, and insurance.
